

## 47 GHz Cumulative Contest for 2021

The 47 GHz Cumulative Contest for 2021 is intended to increase activity on this band, particularly during non-contest periods. Contacts take time and effort, so the band may also be neglected during contests.

Rules are similar to the ARRL 10 GHz & Up Contest, but with the addition of multipliers, to encourage roving and DX contacts:

- Contest period: 1 January 2021 to 31 December 2021
- One point per kilometer of each contact.
- 100 points for each unique call.
- Must move 10 miles to work same station.
- Multiplier – one for each four-digit grid in log, either you or other station.
- All modes allowed, EME encouraged if you can do it!
- Liaison my any means.

Score = Calls + kilometers x multipliers

Example:

W1GHZ FN34uk works N1JEZ in FN34om - 41km

W1GHZ FN34uk works W1FKF in FN44ig – 82km  
(W1GHZ moves)

W1GHZ FN44bl works N1JEZ in FN34om - 73km

W1GHZ FN44bl works W1FKF in FN44ig – 52km

W1GHZ score = 200 (2 calls) + 248 (km) \* 2(grid) = 696

Reporting: Logs to [w1ghz@arrl.net](mailto:w1ghz@arrl.net) by 1 February 2022

Awards:

- Plaque to highest score on each continent with significant activity.
- Certificate to best score in each call area or country
